## Atlas eFX Team FS stops Panoz Race Program 2011

It is not easy for us, but at some point you have to draw a line.

In the recent weeks we unfortunately received no good news from our negotiating partner Andrew Leberle, who negotiated the deal negotiated with Panoz.

Due to the fact that our Panoz Abruzzi Racecar "Spirit of Le Mans" could not be ready for the start of the season, Andrew Leberle tried to wrap up a partner package with the existing (Panoz) racecar. This ultimately failed due to different financial ideas.

In this respect, we will keep the project under review and may take up again at a later time.

Because of the resulting time delays - we wanted the program to be completed in November of last year - it is not possible for us to guarantee our sponsors, partners and drivers a professional platform.

Other projects are not affected by this decision. So we are currently continuing to participate in the GTE and LMP1.
